

Alexander MacFarlane
MANAGING DIRECTOR
Think-21

Mr. MacFarlane is dedicated to environmental improvement through business solutions and innovation. He has provided energy and resource consulting for numerous new construction projects, large developments, and industrial operations. He has won grants on behalf of his current employer totaling over \$600,000 and currently manages a “Greenbuilding” consulting group providing services to non-profit developers in New York City. Mr. MacFarlane is a LEED (Leadership in Energy and Environmental Design) Accredited Professional for green design consulting.

Mr. MacFarlane has experience in diverse fields ranging from applied environmental biology to energy engineering. His ability to communicate complex issues for a general audience enables him to bridge the gap between science and implementation of projects.

Mr. MacFarlane is the author of a book soon to be released by Community Environmental Center entitled “Affordably Green in NYC”. This book outlines a strategy for affordable housing in New York to be built green. The book is backed up by a building currently under construction in the S. Bronx that demonstrates that affordable housing can and should be built to principles of sustainability and efficiency.

M.Sc. Environmental Policy and Management from the International Institute for Industrial Environmental Economics, Lund University, Sweden;

B.A. Environmental Biology from the Center for Environmental Research and Conservation, Columbia University, New York City
